

Curriculum vitae

Data Analyst

Personal details

Name	Shaheer Hussain
Email address	shaheerhussain.datascience@gmail.com
Address	London
Website	shaheerhussain.com

Personal Profile

Data analyst with 3.5 years experience in delivering high impact Power BI dashboards, SQL analysis, and Python based machine learning all within a UK Government/Regulatory environment. Experienced in cleansing and transforming complex datasets with both Python and Power BI to prepare for analysis, converting this data into actionable insights that support data driven decision making processes.

My biggest achievement at MHRA was developing a classification model using Python to prioritise serious adverse drug reactions which enabled a faster identification and escalation of serious cases, Improving patient safety and delivering estimated operational savings of £5000 per month.

Education

Sep 2020 - Jul 2022	Sixth Form The City Academy - Hackney, London BTEC Information technology : Distinction * (Equivalent to A*) A-level Economics and A-level Geography at Grade B
Oct 2022 - Dec 2024	Level 4 Data Analytics apprenticeship Ada, National College for Digital Skills, London Completion of a higher apprenticeship, covering Computer programming, Machine Learning and Data analysis concepts.
Jan 2025 - Mar 2026	BSc (Hons) Digital and Technology Solutions (First class - Distinction) Ada, National college for digital skills, London 1 year top-up to my data analysis apprenticeship with MHRA and Ada to build on previously covered subjects, Making it a level 6 degree apprenticeship.

Employment

Oct 2022 - May 2026	Data Analyst Medicines and Healthcare Regulatory Agency, London Responsibilities included : • Worked closely with stakeholders over Microsoft Teams to gather business requirements, translating these requirements into technical solutions that support data driven decision making. • Extracted, cleaned and transformed large datasets using SQL and Python, ensuring high levels of data quality, consistency and accuracy before analysis. • Designed, developed and maintained interactive Power BI and MicroStrategy dashboards that enabled stakeholders to monitor operational performance and make data driven decisions. • Produced clear data visualisations to communicate complex information in a format accessible to both technical and non-technical stakeholders. • Built and maintained reporting solutions to monitor laboratory equipment orders and maintenance schedules, aiding the department in improving planning and controlling costs. • Developed automation scripts to streamline repetitive data processing tasks to improve efficiency and workflow, reducing manual effort across the reporting workflows, This was done with existing PCL scripts to support existing reporting solutions.
---------------------	---

- Applied Python Libraries including Pandas, NumPy and Scikit-learn to analyse datasets and support machine learning projects where appropriate.

Skills

SQL	Python
DAX	Power BI
MicroStrategy	Dashboard Development
KPI Reporting	ETL
Data Cleaning	Data Transformation
Data Modelling	Data Validation
Pandas	NumPy
Scikit-learn	Classification Models
Regression Models	Stakeholder Management
Requirements Gathering	Agile Working
Cross-functional Collaboration	

Languages

English	Fluent
---------	--------

Hobbies

■ Working on Creative Projects	■ Fitness & Wellbeing
■ Kaggle data exercises	

Courses

Nov 2024	Google Data Analytics - Coursera Completion of eight courses, designed by Google to include hands on, practice based assessments to prepare, process, analyse and share data for thoughtful action.
Jan 2025	HarvardX CS109x : Introduction to Data science with Python An online course of study offered by Harvard University to cover data wrangling, machine learning and visualisation in Python using libraries such as Pandas, Numpy, Scikit-learn and Matplotlib
